

**ATTORNEY BRIAN S. KABATECK ON TECHNOLOGY LITIGATION
AND RIGHTING OLD WRONGS**

The website LawyersandSettlements.com interviewed Brian Kabateck on his range of consumer and civil rights cases, including deceptive advertising claims against Apple Computers and the litigation surrounding insurers who held policies for the victims of the 1915 genocide against Armenians by the Ottoman Empire. Noting his firm's involvement in the genocide cases, Kabateck said, "We're the only lawyers who have brought these kinds of cases. This is not the kind of case we profit off of; we may have enough to cover our expenses, but we're really doing it because it needs to be done."
